Subject: Upper Animas Site

I had a call with Barb Nabors, CDPHE to discuss a number of site assessment issues. We did briefly discuss the Animas site and the recent interest by the County Commissioners in learning more about the

Superfund program. She said she would discuss this site with Monica Sheets this week and will be discussing this site at next week's EPA /CDPHE Superfund program coordination meeting. She was unsure if CDPHE is able to support another fund lead site where it is likely long-term water treatment will be part of the remedy. I did tell her that the enforcement program has identified viable PRPs and recommended that CDPHE request an update on the PRP search.

Victor Ketellapper, Team Leader

EPA Region 8, Superfund Site Assessment Program
